The diagram illustrates a 2D convolutional layer. The input is a 4x4 grid of 16 channels. The output is a 2x2 grid of 16 channels. The stride is 2, and the padding is 1. Each output unit is shown with its receptive field, which covers a 3x3 area of the input. The diagram shows that the receptive fields overlap, and the output units are fully connected to their respective input channels.

I (we) hereby claim the benefit under Title 35, United States Code section 120 of any United States application(s) listed below and, insofar as the subject matter of each of the claims of this application is not disclosed in the prior United States application in the manner provided by the first paragraph of Title 35, United States Code, section 112, I (we) acknowledge the duty to disclose material information as defined in Title 37, CFR 1.56(a) which occurred between the filing date of the prior application and the national or PCT international filing date of this application:
